*We're all about smiles*

A Leader

**in orthodontic care**

Welcome to Gullotta Orthodontics - We would like to congratulate you on taking the first vital steps to having a beautiful new smile!

Gullotta Orthodontics is led by renowned Gold Coast specialist Dr Nino Gullotta and with more than 30 years' experience in the field, Dr Gullotta is the leading provider in the delivery of orthodontic care across the Gold Coast. He's in the business of building confidence through the creation of flawless smiles.

Over the years, he's helped many people with orthodontic problems ranging from crowding or crooked teeth and spacing of teeth to protruding "bucked" teeth and uncomfortable bites.

Every day, Dr Gullotta sees the life changing impact his work has on his patients' self image and confidence, as we reveal their stunning new smile.

As a result of his expertise, in 2007 Dr Gullotta became the first

Invisalign Platinum provider on the Gold Coast. This treatment involves wearing a series of clear, near Invisible aligners, which are changed regularly. Due to the outstanding results he has achieved, Dr. Gullotta has been asked to, and has trained many dentists, hygienists and other orthodontists in this system.

Dr Gullotta is also a pioneer of the Damon bracket system in Australia – a system that uses sliding gates instead of rubber rings to hold the wire in place which equates to less force & friction. The advantage for you is a shorter & more comfortable treatment to attain your perfect smile.

With Dr. Gullotta's world-class customised treatment plans, and a friendly and affordable service, you aren't far from your dream smile.

# About

## Gullotta Orthodontics

Gullotta Orthodontics was founded by Dr Nino Gullotta, a prominent Gold Coast specialist orthodontist with more than 30 years' experience in the field. He loves treating children, but equally gets as much joy and satisfaction in transforming the smiles of adults.

He combines the latest state-of-the-art advances in orthodontic techniques, materials and technologies with a highly personalised, warm and informative approach.

Dr Gullotta has a Master of Dental Science (Orthodontics) from the University of Melbourne. and is a registered specialist in orthodontics with the Dental Board of Australia.

His passion for orthodontics began after working intensively with children who

had cleft palates and other cranio-facial problems at the Brisbane Children's Dental Hospital. After undertaking full-time study, research and clinical work in the field, he became a partner in a Southport private orthodontic practice.

That was 30 years ago. Today, as the principal of Gullotta Orthodontics, Dr. Gullotta continues to maintain his commitment to delivering world-class treatments to his patients – with the support of his highly-trained team.

He is also a member of numerous professional bodies such as the Australian Society of Orthodontists, American Association of Orthodontists, World Federation of Orthodontists and Australian Dental Association.

# How

## can we help?

Not every patient is the same and we like to treat everyone as an individual. Treatment plans are customised to the patient's individual needs using our 4-step methodology (see page XXX).

At Gullotta Orthodontics, we offer a comprehensive range of orthodontic services including almost invisible orthodontics such as Invisalign, clear ceramic brackets – as well as the traditional types of metal braces.

## We also offer the following:

### **Advanced smile design**

We deliver great smiles to patients from all walks of life. Our goal is to give them a smile they will be proud of. Using modern concepts, we design stunning smiles to suit and complement individual facial features.

### **Outstanding customer service**

We have a professional and empathic approach, but try to have fun, too. As part of our treatment plans, we offer education and information to our patients along the way. We also offer longer appointments so we can spend quality time with our patients – but we still always run to schedule as we know time is important.

### **State-of-the-art treatments**

Dr Gullotta combines the latest technological treatments with his extensive specialist experience to give our patients world class treatment and results. Recently our clinic has introduced:

- *Itero intra-oral video scanner, an apparatus engineered to work with the Invisalign system by using a wand to scan inside the mouth, recording a 3D image of your teeth. This means no more uncomfortable impressions, and can provide an accurate 3D image of what your teeth will look like at the end of treatment.*

- *AcceleDent, a mouthpiece that is worn daily for 20 minutes. It uses patented technology to gently vibrate the teeth and the surrounding tissues. Early research suggests it improves blood flow around the teeth, resulting in less discomfort, greater tooth movement and shorter orthodontic treatment times.*

### **Treatment for all ages**

Any age is suitable for orthodontic treatment. However, children should be assessed around age 10. If there are obvious signs of crowding or cross bite, they should be seen earlier.

### **Payment plans**

We understand that having a smile you are proud of is a significant investment in the future. That's why we are pleased to be able to work with families to make treatment plans both accessible and affordable.

- *Denticare, a payment plan solution that is specifically designed for Dental and Orthodontic practices. This means you can get the smile of your dreams without having to pay the full amount up front. Instead, we offer an initial deposit with weekly/monthly payments to follow.*

***At Gullotta Orthodontics, we'll manage underlying dental problems to give our patients healthier teeth, mouth and gums. The result – a better quality of life!***

# Our Simple

## 4 Step Process

Going to the orthodontist doesn't need to be a daunting experience.

That's why Gullotta Orthodontics makes it easy, comfortable and convenient for patients to achieve that beautiful smile for life.

We have developed a 4-step process that helps us deliver exceptional results and care.

DISCOVER

DISCUSS

DELIVER

DELIGHT

1

## DISCOVER

As each of our patients is different, we set time aside to discover individual wants and needs. A treatment plan can be as unique as a patient's smile, so as part of Dr Gullotta's comprehensive clinical examination, he will listen to a patient's concerns and uncover any orthodontic or dental concerns. Patients will undergo a detailed orthodontic assessment, including X-rays and scans to help with the assessment.

2

## DISCUSS

Following the comprehensive examination, Dr Gullotta will discuss and review all treatment options regarding braces or aligners. He will listen closely to a patient before offering his expert advice on the best course of treatment, estimated treatment time, cost and other vital information. The ultimate treatment plan will be tailor made for each patient, taking into account their wants, needs, circumstances and lifestyle.

3

## DELIVER

Gullotta Orthodontics prides itself on delivering first-class care combined with excellent customer service. We'll solve your dental problems with a tailored treatment plan and ongoing support. As part of our customer service commitment, we create a caring, comfortable and relaxed environment with clean, ultra-modern premises at a convenient location in Southport. We offer after-hours access to our orthodontists for emergencies, and extended appointment times before and after school.

4

## DELIGHT

It's time to enjoy your beautiful new smile! Dr Gullotta's aim is to achieve exceptional results in the shortest time possible, selecting treatments that suit your circumstances. He also offers friendly and informative ongoing care, post treatment, so you can enjoy your perfect smile with ongoing confidence.

“A smile is a curve that sets everything straight”

**- Phyllis Diller**

## CASE STUDY

This 15 year old girl is a part-time model and was desperately seeking a solution for her crowding without using conventional braces.

We achieved a stunning result using the clear, removable aligner system, Invisalign.

## CASE STUDY

This 30 year old gentleman was keen to get his teeth straightened so that he would have a dazzling smile for his wedding day.

Combining Dr Gullotta's expertise with modern braces and technology including Accedent, we were able to get the job done with plenty of time to spare for his special day.

## CASE STUDY

This 8 year old girl was very self-conscious about her severely twisted upper front tooth.

To boost her self-confidence, we treated her early to achieve her perfect smile - which she now flashes often!

## CASE STUDY

This 15 year old male was very self-conscious about the spacing and shape of his teeth and was reluctant to smile.

After we closed up the spaces, his dentist placed veneers to enhance the final result. He now has no problem smiling !

## CASE STUDY

This 12 year old girl was very apprehensive about having orthodontic treatment.

She was surprised at how easy treatment was, and now has this amazing smile for the rest of her life.

## CASE STUDY

This gentleman aged 32 wanted to achieve better aesthetics and function of his teeth.

He was amazed and very happy with the result.

## CASE STUDY

As a child, this gentleman had limited braces treatment and at the age of 35 he wanted his open bite and crowding fully resolved. Despite his age, we were able to achieve a beautiful result.

## CASE STUDY

This lady aged 43 was delighted with the result we could achieve for her. It shows that age is no barrier to achieving great looking, healthy results.

## CASE STUDY

This girl aged 13 was eager to close her upper spacing. We were happy to do so and now she smiles confidently
